Bulletin No. 170 Series, "Abstracts of DWR Publications"

Twice annually, the Department of Water Resources publishes its Bulletin No. 170, "Abstracts of DWR Publications". These reports are free. These reports contain abstracts of all Department of Water Resources technical bulletins published during the previous six months, a cumulative index to those abstracts, a price list of those bulletins published during the past five years which remain in print, and a list of libraries which shelve the bulletins. If you would like your name placed on the mailing list, write to Department of Water Resources, Attn: Reports Administration, P. O. Box 388, Sacramento, CA 95802.

In addition, you may wish to purchase Bulletin No. 170-69, "Abstracts of DWR Publications: 1922-1969". This report summarizes the 600-odd major engineering reports published by the Department of Water Resources and its predecessor agencies since 1922. It contains a complete subject index and lists the purchase price of those reports remaining in print. It is available, at $5.00 a copy from: State of California, Documents Section, P. O. Box 20191, Sacramento, CA 95820. Residents of California should add 5 percent sales tax, thus paying $5.25. This price includes shipping. Please make checks or money orders payable to STATE OF CALIFORNIA.

ABSTRACT

Climatological data are collected from 6,352 weather stations located in all 58 California counties, as well as in Oregon, Nevada, and Arizona, and in Mexico. These stations measure rainfall; some also report temperature and evaporation data. / The Climatological Master Station Index (Climat MSI) is recorded on magnetic tape by the Department of Water Resources in its Computer Systems Branch. The stations are described by name, by drainage basin, by their exact site according to the U. S. Public Land Survey, and by latitude and longitude, and their years of record are shown. The California stations are further identified by the county and the Department district in which they are situated. The names of the 90 cooperating agencies that supply this information are also listed. The master computer file is updated continually. / Climatological station data are published periodically for the use of all interested agencies and the general public. Earlier publications by the Department of Water Resources are two office reports: "Index of Climatological Stations in California, 1966", published in April 1966 and "Index of Climatological Stations in California, 1961", published in June 1961.

MAJOR DRAINAGE PROVINCE and HYDROGRAPHIC UNITS

INTRODUCTION

The measurement of precipitation is basic to intelligent planning of environmental modifications, such as those which involve enhancement of water supply and evaluation of potential flood hazards.

This issue of the "Index of Climatological Stations in California" is a compilation of 6,352 weather stations in California engaged chiefly in measuring rainfall. It also includes some stations situated in Oregon, Nevada, and Arizona, and in the states of Baja California and Sonora in Mexico. Some of these stations also report other types of data, such as temperature and evaporation. The information presented in the index results from the cooperative effort of 90 agencies whose records are listed.

Information published in the 1961 and 1966 editions of the index has been updated to assist local agencies in their data network planning. The main files of the Climatological Master Station Index (Climat MSI) are recorded on magnetic tape (by Process 268). Listings of the stations can be obtained in five standard alphabetic formats: by state, by district, by volume number of the Department's Bulletin No. 130 series*, by county, and by drainage basin by district (using Process 309). The index has been compiled from records of the Environmental Data Service (formerly the U. S. Weather Bureau), the Department of Water Resources, and many other agencies, both public and private. The list of station names has evolved from three sources: 1) those used by the EDS in its "Climatological Data in California", 2) "Water Resources of California", Bulletin No. 1, published by the State Water Resources Board in 1951, and 3) "Flow in California Streams", Bulletin No. 5, published by the California Department of Public Works, Division of Engineering and Irrigation, in 1923. Data on geographic location is coded along with station names and numbers.

The index is kept current by using the Department's Computer Systems Branch's Process 268 to make corrections to the tape containing it. Revisions are taken from DWR Form 3222, which cooperating agencies use to advise the Department of new information. (Three blank sets of this form are provided at the back of this report.)

---

* "Hydrologic Data", Bulletin No. 130, Volumes I - V, and Appendixes, published annually by the Department of Water Resources.

KEY TO INDEX CODES

Drainage Basin (Columns 1-3, Index Cards #1 and #2*)

Each of the 12 major drainage provinces has a letter code and the areas within each have a number code. These are shown on Plate 1.

Alpha Order Number (Columns 4-7, Index Cards #1 and #2)

The alpha order numbers were originally assigned to each station to denote its alphabetic sequence. They are the same numbers used by the U. S. Weather Bureau (the present Environmental Data Service) in the late 1950's. Alpha-numeric sequence numbers are now assigned by referring to the latest alpha listing of the historic weather station name list.

Subnumber (Columns 8 and 9, Index Cards #1 and #2)

These numbers supplement the four-digit alpha order number and are used to maintain an alphabetical sequence of station names beyond the capability of the system reported in Climatological Data.

Station Name (Columns 13-37, Index Card #1)

When no obvious station name exists, a name must sometimes be devised for a weather station. Frequently this is the name of the nearest post office, followed by the distance and direction in miles and 16 compass points. For example, Canby 11 SW denotes a station located 11 miles southwest of the post office at Canby. When two observers occur at a single location, the town name is sometimes followed by the name of the observer's location. An example of this: Stonyford Cooley Ranch, where Stonyford is the place name and Cooley Ranch is the observer's site. When two precipitation gages are situated at one site, one can be identified also with a number, such as Folsom No. 2.

The responsibility for selecting the station name rests with the agency or individual who establishes the station.

The space for station names is restricted by the computer to 25 columns; therefore, some abbreviations are necessary. Some common ones are:

AP - Airport
PH - Power House
STA - Station
HMS - Highway Maintenance Station
FS - Fire Station
RS - Ranger Station

Elevation (Columns 38-42, Index Card #1)

The elevation of the ground surface at the gage is expressed to the nearest foot above mean sea level (USGS datum). The elevation is generally obtained by interpolation between the contours of USGS topographic maps.

* Refer to copies of DWR Form 3222 at the back of the Index.

Section, Township, and Range (Columns 43-50, Index Card #1)

The section, township, and range are based on the U. S. Public Land Survey, in which 6-mile-square townships are divided into 36 sections; these are further subdivided into 16 quarter-mile-square lots that contain roughly 40 acres. The township, range, and section used here are identical to those shown on the maps of the U. S. Geological Survey, with the official Department extension of the sectioning into unsurveyed areas.

40-Acre Tract (Column 51, Index Card #1)

A letter code identifies the position of each tract within a section. The letters "I" and "O" have been omitted to avoid confusion with the numbers "1" and "0".

D	C	B	A
E	F	G	H
M	L	K	J
N	P	Q	R

40-Acre Tract

Base and Meridian (Column 52, Index Card #1)

The code for this column is:

G - Gila and Salt River Base and Meridian
H - Humboldt Base and Meridian
M - Mount Diablo Base and Meridian
S - San Bernardino Base and Meridian
W - Willamette Base and Meridian

Latitude and Longitude (Columns 53-65, Index Card #1)

Latitude and longitude are given to the nearest second, when the value is known. The Environmental Data Service lists its stations by degree and minute only. A zero value or a blank space for seconds in these columns generally means that latitude and longitude have been obtained from the Data Service and have not been verified in the field by personnel of the Department of Water Resources.

COOPERATOR NUMBER (Columns 66-68, Index Card #1)

This number is assigned from the following list

00 - Private Cooperators
01 to 399 - Private Agencies

001 Kern County Land Company
002 Boswell Company
003 Pacific Gas and Electric Company
004 Southern California Edison Company
005 California Electric Power Company

006 Northwestern Pacific Railroad
007 California-Oregon Power Company (COPCO)
008 California Water Service Company
009 Stanford University
010 Amateur Radio Weather Network KTRB

011 Southern Pacific Company
012 Miller & Lux, Inc.
013 Central California Irrigation District
014 California Water and Telephone Company
015 Escondido Mutual Water Company

016 Temescal Water Company
017 Gage Canal Company
018 Foothill Lemon Company
019 Fontana Union Water Company

00 to 799 - Counties and Municipalities

400 Alameda County Flood Control and Water Conservation District
401 Hetch Hetchy Water District
402 San Francisco Water District
403 Sonoma County Flood Control and Water Conservation District
404 Oakdale Irrigation District

405 City of Los Angeles, Department of Water and Power
406 City of San Diego
407 San Benito County
408 Contra Costa County Flood Control and Water Conservation District
409 San Jose Water Works

410 Los Angeles County Flood Control District
411 Marin County Engineer
412 East Bay Municipal Utility District
413 Marin Municipal Water District
414 Santa Clara Valley Water Conservation District

415 Orange County Flood Control District
416 Ventura County
417 Metropolitan Water District
418 Vallejo Water Department
419 Tehama County Flood Control and Water Conservation District

420 Stanislaus County
421 San Mateo County
422 Sacramento County
423 Santa Cruz City Engineer
424 Shasta County Department of Water Resources

425 Butte County Department of Public Works
426 Santa Clara County Water Conservation District
427 Monterey County Flood Control and Water Conservation District
428 San Diego County
429 San Bernardino County Flood Control District

430 San Luis Obispo County Flood Control and Water Conservation District
431 Riverside County Flood Control and and Water Conservation District
432 Vista Irrigation District
433 Helix Irrigation District
434 Santa Barbara Water Department

435 Montecito County Water District
436 San Bernardino Water Department
437 Imperial Irrigation District
438 Coachella Valley County Water District
439 Unassigned
440 Sacramento Municipal Utility District

800 to 899 - State

800 Northeast Counties Ground Water Investigation, Department of Water Resources
801 Pomology Department, University of California, Davis
802 Irrigation Department, University of California, Davis
803 Mariposa Area Investigation, Department of Water Resources
804 State Department of Beaches and Parks

805 State Department of Fish and Game
806 Department of Water Resources, Land and Water Use
807 Santa Barbara Project, Department of Water Resources
808 Division of Forestry
809 Division of Highways-Maintenance Stations

810 Bureau of Plant Quarantine Inspection Stations
812 Regional Subsidence Exploration, Department of Water Resources
813 Department of Water Resources, Southern District
814 University of California, Davis, Westside Field Station
815 University of California, School of Forestry
816 University of California, Imperial Valley Field Station

900 to 999 - Federal

900 United States Weather Bureau (Climate Data)
901 Corps of Engineers, San Francisco District
902 U. S. Air Force, Air Weather Service
903 Corps of Engineers, Sacramento District
904 U. S. Bureau of Reclamation

905 U. S. Forest Service
906 Agricultural Research Service
907 State Climatologist
908 U. S. Naval Post Graduate School
909 Soil Conservation Service, Watsonville
910 U. S. Weather Bureau, Fire Weather Punch
911 Military Weather Stations in California
912 Sacramento Fruit Frost Cooperators
913 Corps of Engineers, Los Angeles
914 U. S. Marine Corps, Camp Pendleton

915 U. S. Weather Bureau (unpublished climate data), Washington, D. C.
916 U. S. Geological Survey
917 International Boundary and Water Commission

DISTRICT BOUNDARIES
DISTRICT CODE FOR CLIMATE INDEX

SHOWING CODE FOR COLUMN 25,
CARD 2 OF CLIMATE STATION INDEX

Cooperator's (Coop's) Index Number (Columns 69-74, Index Card #1)

This number is assigned to the station by the agency which supplies this record to the Department.

Record Began, Record Ended, Years Missing (Columns 10-19, Index Card #2)

The index shows the calendar year in which each station first began recording and, where applicable, the year it ceased. Missing years of record are indicated so that the total years of record can be calculated.

County Code (Columns 20 and 21, Index Card #2)

The county in which each station is located is identified by a modification of the code used by the State Division of Highways. This code also includes designations of stations in adjacent states and some California stations whose county locations are not given.

Alameda	60	Marin	21	San Mateo	41

Arizona	63		

DWR District (Column 25, Index Card #2)

The districts of the Department of Water Resources are identified by the following code: 5, Northern District; 7, Central District; 8, San Joaquin District; and 3, Southern District. District boundaries are shown on Plate 2.

Bulletin 130 Vol. No. (Column 30, Index Card #2)

The Bulletin 130 volume is identified by a number that corresponds to the number of the volume. The areas of the State covered by each volume are shown on Plate 3.

Update Code (Column 75, Index Cards #1 and #2)

The update code is one of the more important sources of information used in revising the entries. An "A" is entered in the column when a new station number and subnumber are added; a "C" is entered for corrections and a "D" for deletions.
